BAFFLE

Marc Sadler

I_Baffle è un sistema brevettato che permette di sospendere a soffitto i pannelli fonoassorbenti Snowsound, esaltandone le caratteristiche di leggerezza ed eleganza. La possibilità di regolazione in altezza dei cavi e la varietà di misure e colori disponibili, permettono di ottenere composizioni sia esteticamente che acusticamente personalizzate. Il sistema brevettato di unione del pannello ai cavi è totalmente a scomparsa: un piccolo giunto cilindrico nasconde al suo interno il sistema di fissaggio.

EN Baffle is a patented system designed to hang Snowsound sound-absorbing panels from the ceiling, showcasing its lightness and elegance. The adjustable height of the cables and the array of sizes and colours available make it possible to achieve compositions that can be personalized for aesthetics and sound. The patented joining system of the panel to the cables is completely invisible: a small cylindrical joint hides the anchoring system inside.

F Baffle est un système breveté qui permet de suspendre au plafond les panneaux phono-absorbants Snowsound, en exaltant leurs caractéristiques de légèreté et d'élégance. La possibilité de régler les câbles en hauteur et la variété de dimensions et de coloris disponibles, permettent d'obtenir des compositions personnalisées aussi bien esthétiquement qu'acoustiquement. Le système breveté d'accrochage des panneaux aux câbles est totalement escamotable: un petit joint cylindrique cache en son intérieur le système de fixation.

D Baffle ist ein patentiertes System für die Deckenmontage der schallabsorbierenden Snowsound-Paneele. Auf diese Weise werden die Eigenschaften der Leichtigkeit und der Eleganz in den Vordergrund gestellt. Durch die Möglichkeit die Länge der Stahlseile zu variieren und die Auswahl an zur Verfügung stehenden Maßen und Farben erhält man ästhetisch und akustisch gesehen personalisierte Lösungen. Die patentierte Halterung der Paneele an den Stahlseilen ist völlig unsichtbar: eine kleine zylinderförmige Verbindung verbirgt in ihrem Inneren das Befestigungssystem.

E Baffle es un sistema patentado para colgar del techo los paneles fonoabsorbentes Snowsound, acentuando su elegancia y ligereza características. Gracias a la posibilidad de ajustar la longitud de los cables y el surtido de colores y medidas disponibles, se pueden personalizar estéticamente y acústicamente las configuraciones. El sistema patentado de unión del panel con los cables es totalmente oculto: el sistema de fijación queda escondido dentro de un pequeño empalme cilíndrico.

Pannello con imbottitura interna in poliestere a **densità variabile** Snowsound® Technology. Rivestimento esterno in tessuto di poliestere Trevira CS®. Con supporti in acciaio per attacco diretto a soffitto.

Panel with polyester internal padding with Snowsound® Technology **variable density**. Polyester covering in Trevira CS® fabric. With steel grips for direct attachment to ceiling.

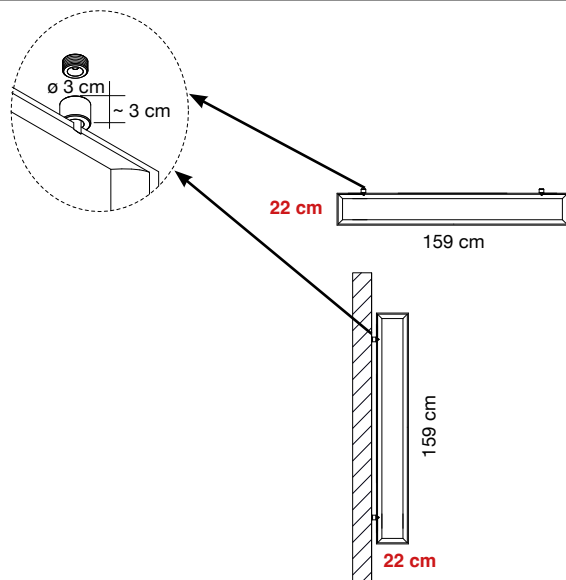

Panneau avec rembourrage interne en polyester à **densité variable** Snowsound® Technology. Revêtement externe en tissu de polyester Trevira CS®. Avec supports en acier pour fixage direct au plafond.

Panel con acolchado interior de poliéster de **densidad variable** Snowsound® Technology. Revestimiento exterior de tejido de poliéster Trevira CS®. Con soportes de acero para anclarlo directamente contra el techo.

Paneel mit Polyester-Füllmaterial von **unterschiedlicher Dichte** Snowsound® Technology. Polyester-Bezug aus Trevira CS®-Material. Mit Stahlhalterungen für die direkte Deckenmontage.
