

A close-up photograph of a person's face wearing a white, textured knit mask. The mask covers the nose and mouth, leaving only the eyes visible. The texture of the knit fabric is clearly visible, showing a fine, ribbed pattern. The lighting is soft and even, highlighting the contours of the face and the texture of the mask.

## Flap ceiling

**I** I telai a soffitto realizzati in acciaio cromato sono dotati di bracci mobili, ai quali vengono applicati i pannelli Flap mediante giunti articolati. I telai sono modulari e possono essere collegati in linea fra di loro. I pannelli possono essere ruotati e inclinati per generare configurazioni planari, concave o convesse in base alle esigenze estetiche ed acustiche. Le configurazioni possono essere facilmente modificate in qualsiasi momento.

**EN** The ceiling-mounted frames are in chrome-plated steel, fitted with mobile arms, to which Flap panels are anchored with articulated hinges. The frames are modular and can be connected together in a parallel line. The panels can be rotated and inclined to make planar, concave or convex configurations, depending on aesthetic and acoustic needs. The configurations can be easily adjusted at any time.

**F** Les châssis de montage plafond en acier chromé sont dotés de bras mobiles auxquels les panneaux Flap sont fixés au moyen de liaisons rotule. Les châssis sont modulables et peuvent être reliés entre eux de manière linéaire. Les panneaux pivotants et inclinables permettent de former des agencements planes, concaves ou convexes selon les exigences esthétiques et acoustiques. Les agencements sont aisément modifiables à tout moment.

**D** Die Rahmen aus verchromtem Stahl an der Decke verfügen über bewegliche Arme, an denen die Flap Paneele über die Drehgelenke angebracht werden. Die Rahmen bestehen aus Modulen, die in einer Reihe miteinander verbunden werden können. Die Paneele können gedreht und geneigt werden, um je nach gewünschter Ästhetik und Akustik eben, konkav oder konvex ausgerichtet zu werden. Die Einstellungen können einfach und jederzeit verändert werden.

**E** El bastidor de acero cromado del techo está equipado con brazos móviles, a los que se aplican los paneles Flap mediante articulaciones esféricas. Los bastidores son modulares y se pueden colocar conectándolos en batería. Los paneles se pueden girar e inclinar para crear configuraciones planas, cóncavas o convexas conforme a las necesidades estéticas y acústicas. Las configuraciones se pueden modificar fácilmente en cualquier momento.
